3 GETTING STARTED

3.1 APPLICATION OVERVIEW

The Kentucky Clinic Management System is a comprehensive system that:

◆ Is a Web-based system that is integrated with WIC Direct—the online, WIC EBT solution
◆ Is a comprehensive clinic management system including patient registration, service reporting, billing, and management reports
◆ Has an appointment scheduling module
◆ Has the option to place patients in a household or register them individually
◆ Features a Growth Chart module that automatically plots measures
◆ Contains a WIC, automated risk assignment module
◆ Has a food package assignment module that supports the new Federal food package rules for WIC
◆ Enables WIC benefit issuance in both a paper system and eWIC
◆ Accesses a statewide immunization registry

The WIC Direct System is an EBT (electronic benefits transfer) system that is an online, real time, electronic system in which WIC participants access their benefits using a magnetic stripe card, similar to a debit card, instead of a traditional paper food instrument. Highlights of this process include:

◆ A participant is certified as WIC-eligible at a clinic.
◆ An EBT account with participant demographic information is established through the Kentucky CMS System for each participant.
◆ An eWIC card is issued to the participant in the clinic and the participant selects a four-digit PIN (personal identification number).
◆ Monthly food benefits are issued to the client and posted electronically to the participant’s account.
◆ The eWIC card is used to access food benefits in the retail store.
◆ The EBT host (server) plays the central role in the WIC Direct System. The Kentucky WIC Host interacts with the WIC EBT System to
  ▪ Exchange claim, auto-reconciliation, and error notification files
  ▪ Provide authorized product lists
  ▪ Process online retailer purchase requests
In the WIC Direct System, each family/household member’s food benefits are aggregated into a single account. The household account consists of specific types and quantities of food items, each with specific eligibility and expiration dates. These dates are cyclical and are set by the State WIC Authority.

Most WIC participant information is recorded in the CMS system, and then transferred seamlessly to the EBT System. During the initial registration process, registration clerks will be the first point of contact for gathering information about participants in the WIC EBT program. Much of this information is automatically transferred from the CMS system to the EBT system as information is saved during the registration process. Participant, household, eWIC card, and benefit information is also updated in the EBT system each time a change is made in the CMS.

3.2 LOGGING INTO THE APPLICATION

To login to the Kentucky CMS System through the CDP Portal, double click the portal icon, enter the user name and password in the appropriate fields, and click LOGIN. When a user logs into the CDP Portal, they will be logged in to both the CMS and WIC Direct Systems and will be able to move seamlessly between the two systems.

After login credentials are validated, you will be taken to the Main Menu described in Section Error! Reference source not found. “Application Main Menu”.

3.4.3 NAVIGATION TIPS

Using Search Filters

◆ When using search filters in the CMS or WIC EBT Systems, the filters may differ in appearance, however the operations work in the same manner.

Click inside of the search filter box; enter information, and then click [SEARCH].

Examples:

![Household Lookup Example]

There are several methods of selecting information within the search filters. These include: typing the information into a search box, drop-down menus, scroll menus, and more.

Drop-down Menus

◆ Many times the Search Filter sections will also contain drop-down menus. Clicking in the drop-down field will display a list of choices. Left-click on the arrow, then click on one of the answer choices. Below are examples of drop-down menus.
Main Screen Arrow Indicator

◆ A red arrow pointing to a screen name indicates the screen the user should be on to continue. The following example shows that in order to get to the Account Balance screen, the user must first be on the Patient Menu screen.

Patient Menu screen

To access the Account Balance screen from the Patient Menu screen, click Account Balance.
Scroll Menus

Another method of selecting information for a search is the scroll menu. Use the arrows on the side to scroll through the options, then click an answer choice and it will be highlighted. This is a multi-item select field. To select multiple items from the list, hold the “Ctrl” button on the keyboard and click multiple items.

Example:

Selecting Individuals

There are many instances in the CMS System in which a single household or patient should be selected from a list of households or patients, and then a button must be clicked to perform a function with that individual.

In some cases, a radio button must be selected that corresponds with the desired information. This is shown below in the Household Search screen. After the radio button has been marked, click a button to perform the desired function.
A similar way of selecting an individual from a list may be check-marking a box corresponding with that individual.

After an individual is selected, then any of the buttons above may be selected: Delete, Transfer, Registration, Patient Menu, etc. If a button is clicked before selecting an individual, the following message may appear:

**Must Select Patient for**

### Initiating a Search

- In the EBT System, the Search button is used to initiate a search.
Entering a Location

- The filter labeled “City/ State/ Zip” requires information entered in a very specific format. It is easier to avoid error messages by typing just the city, then waiting for the drop-down of cities to appear and selecting one. Do not type a space after entering the city.

<table>
<thead>
<tr>
<th>City, State Zip</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frankfort</td>
<td>42141</td>
</tr>
<tr>
<td>Ft. Madison</td>
<td>49040</td>
</tr>
<tr>
<td>Glasgow</td>
<td>42141</td>
</tr>
</tbody>
</table>

Links

- In the EBT System, links underlined in blue are links to related information, such as a household number, patient or participant names, vendor names, email addresses, etc.

Examples:

<table>
<thead>
<tr>
<th>Household Number</th>
<th>Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>Test Vendor</td>
</tr>
<tr>
<td>0052605</td>
<td>Test Vendor 2</td>
</tr>
</tbody>
</table>

- In CMS, links underlined in black are links to related information, such as household numbers and patient numbers.
CMS and EBT have separate browser windows

- When navigating from the CMS System into the EBT System, there will always be a separate browser window that pops up for the EBT System. This means that clicking the “back” button at the top of the browser will not go back to a CMS screen. To return to CMS, just close out of the EBT browser window.

***Note: There are multiple browser windows open.***
To close out of the EBT browser window, click the \( \times \) at the top right portion of the screen.

**Required Fields**

- Any field with a red asterisk* next to it is a required field. The screen cannot be completed until the required information has been entered.
In the CMS System, there are some screens that require scrolling to the right to view all the fields. These fields extend beyond the width of the screen. The Household Member screen is an example.

The screen must be scrolled so that the information to the right can be seen: Emergency Name, Medical Home, LEP (Limited English Proficiency), Primary Language, and Comments.
In the EBT System, there are instances where icons will only be revealed after the cursor is moved over text.

In the example below, the EBT Vendors screen, the cursor moved over “CDP Market”. Note the icons that appeared.
Another instance where this occurs is on the EBT Users screen.

<table>

**Lists of pages of results**

- After performing a search, there may be several pages of results, but only the first page is visible. Use the arrow buttons to move to the next, last, previous, and first pages.
- Notice that the example shown on the following page has 3 pages of results. The Page Size is 10, therefore 10 results are shown. Use the arrows to navigate through the pages.
- The page size can be changed to show more or less items per page. Change the number in the Page Size box and click Go.
**Entering Measurements**

- When entering measurements in the Growth Chart application, it is important to pay attention to the filters. There are separate filters for feet and inches and pounds and ounces. It is not necessary to enter “ft.” or “in.”, just enter the numeric measurement.

<table>

- The person’s measurements shown above would be 5 feet, 4 inches. They would weigh 139 pounds, 2 ounces.
4 PATIENT FUNCTIONS

Patient functions are functions that can be performed for an individual, rather than a household. These functions include searching for a patient, editing patient information, and registering a patient.

4.1 HOUSEHOLD SEARCH & PATIENT SEARCH SCREEN

REMINDERS FOR INCOME DOCUMENTATION FOR WIC CERTIFICATION

- Enter zero (0) in the income field when the participant reports zero household income (i.e. there is no income for the household).

- If an income screening has never been done on the household (for example, participants with Medicaid, KTAP, or Food Stamps), the annual income field will be blank. If income screening is not required, the field should be left blank. CMS will accept a blank income field. If an income screening has been done, the annual income field may contain the annual amount.

- Annual income fields should be blank when income is unknown or has never been assessed (CMS will accept a blank income field). Do not enter nines (99999) for unknown income in any income fields in CMS. Nines in the income field in CMS are considered as a dollar amount (i.e. $99,999). Only enter nines if it is the income amount (i.e. $999.99).

- Nines (99999) appearing in the annual income field on Registration may be from the transfer of income data from Bridge to CMS (99999 was entered in the Bridge system for unknown income). If household income has not been assessed or is not being assessed, nines should be deleted from the annual income field in CMS leaving the field blank (CMS will accept a blank income field); otherwise it will appear that the annual household income is $99,999.

- When household income is assessed for a patient, the Income Assessed Date on Registration must be completed with the date income was assessed to receive the fourth registration label
